Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krames et al., Saeki, and Vakhshoori, considered together.

The device of Krames figure 13 shows the structural features of claims 1 and 15, for example, including DBR 20A, light-emitting layer 2, layers 20B formed on the light-emitting layer, and a roughened top surface. Figure 8B of Saeki is similar, where layer 15 is the semiconductor layer having a roughened top surface. Vakhshoori figure 2 shows a similar roughened top surface, above a light-emitting layer, which is itself above a mirror (column 3, line 4). A DBR as taught in the other two references would have been obvious instead of a mirror in order to enhance the reflective properties of the layer. Although all three of these references show roughening having a certain regularity, the examiner assumes that such surfaces would be encompassed by the claim language, because Applicant's figure 2B shows a similar surface which the specification regards as "roughened." Specific material as recited in the claims would have been obvious in order to obtain light emission of a desired wavelength, and in order to allow the device to emit such light emission as desired.
